RoshiniM

CAREER OBJECTIVE

To solve real-world problems by building practical software and intelligent solutions, while continuously learning and applying new ideas to create meaningful impact.

INTERNSHIPS

LAMDA TECH SOFTICS Dec-2024

PROJECTS

Medicine Vending Machine Prototype, IoT Aug 2025
ROLE : Sensor Expert

- Developed an IoT-based smart medicine vending machine prototype for automated medicine dispensing.
- Integrated sensors and a microcontroller to detect medicine availability and manage the dispensing mechanism.
- Implemented real-time monitoring of stock levels and system status for efficient operation.
- Improved automation and accessibility in healthcare services through smart dispensing technology.

HYBRID RENEWABLE ORCHESTRATION July 2025 - Aug 2025
Role : Full stack Developer (Web)

- Developed an AI-powered solar optimization platform to improve photovoltaic efficiency under varying environmental conditions.
- Integrated real-time environmental monitoring and predictive analytics to forecast solar energy generation and optimize performance.

Virtual Herbal Garden, MERN Stack Apr 2025 - May 2025
Role : Full stack Developer(Web)

- Designed an interactive user interface that allows users to explore herbal plants with images, descriptions, and medicinal uses.
- Implemented a database to store plant details, including scientific names, benefits, and traditional medicinal applications.
- Integrated search and filter functionality to help users easily find specific herbs and plants.
- Provided multimedia support (images/videos) to enhance learning and improve user engagement.

Cosmic Watch Platform Feb-2026
Role : Full stack Developer (Web)

- Integrated NASA NeoWs API to fetch live asteroid data including size, velocity, and distance from Earth.
- Implemented a risk analysis system to classify asteroids based on hazard status and proximity.

EDUCATION

B.E-CSD Kongu Engineering College , Erode
CGPA: 7.97 2023 - 2027

HSC Srinivasa Vidhyalaya Matric Hr School,Udumalapet
Percentage : 90.6 2022- 2023

AREAS OF INTEREST

- Full-Stack Development
- UI Designer
- Mobile application Development

TECHNICAL SKILLS

Languages : Java, Python, C, SQL
Web & Mobile : React.js,HTML, CSS, TailwindCSS.
Database : MongoDB, PostgreSQL,
Data & Visualization : PowerBi
Frameworks : Pandas, NumPy, Git-Hub
Tools : Figma ,Unity

ACHIEVEMENTS

Gen-ai-buildathon - 1st prize 2026
IIT Bhubaneswar hackathon finals - 5 prize 2026
IIT Delhi Finallist - Start up Debate 2026
Technical quiz at Kec - 1st prize 2025

PAPER PRESENTED 2025

Presented AI in Schools at CIT, Coimbatore – focused on AI's role in personalized learning.

Presented Virtual Reality at Sri Ramakrishna Engineering College, Coimbatore – explored applications in immersive tech, healthcare, and design

LEADERSHIP

Executive member - CsdA Club 2026
Class Representative - Csd C Section 2024

Research & Innovation

Developing an AI-based solar optimization platform to improve photovoltaic efficiency, with ongoing efforts toward product commercialization and patent filing.
